Software Engineer with 4 years of experience in software development, cloud solutions, and technology-driven projects. Skilled in designing, developing, testing, and maintaining software applications, solving technical problems, and implementing efficient digital solutions. Experienced in mentoring young professionals, conducting practical technology training, developing interactive learning materials, and promoting digital literacy. Committed to leveraging technical expertise, innovative thinking, and problem-solving skills to deliver high-quality software solutions and support digital transformation.

EDUCATION

Northern University Bangladesh- *Dhaka, Bangladesh* September 2022

Bachelor's Degree – Computer Science And Engineering, **CGPA: 3.71 / 4.00**

Excelled in courses (>90% marks): Object-Oriented Programming, Data Structure and Algorithm, DBMS, OS, Software Engineering, All Mathematics courses

TECHNICAL SKILLS

Languages: Java, Python, PHP, JavaScript, React, Node.js, Flutter, MySQL, PostgreSQL, MongoDB, AWS.

Technologies: Framework/Libraries (Kafka, React, React-Native, Flutter, Bootstrap, Node.js, jQuery, Express)
Database (MySQL, MongoDB, Google Firebase, PostgreSQL, DynamoDB)
Tools (Git, Bitbucket VS Code, Trello, JIRA, MS Project, IntelliJ, Eclipse, Android Studio)
Methodologies (REST, Agile, Microservices, Continuous Integration/Deployment, Kubernetes, Jules

WORK EXPERIENCE

Infinity Vision - *Dhaka, Bangladesh* *0*1 Jan 2026 - Present

Software Engineer

- Automated ServiceNow ticket creation workflows to reduce manual helpdesk requests and improve internal support efficiency.
- Designed and developed scalable web applications using PHP, MySQL, JavaScript, and modern web technologies to manage customer profiles and order information, improving data accessibility and customer support efficiency.
- Implemented object-oriented solutions using Java, SQL, and relational database mapping techniques to enhance code reusability, modularity, maintainability, and debugging efficiency.
- Led cost optimization initiatives by evaluating technical workflows and improving resource utilization, contributing to annual operational cost savings.
- Developed interactive web applications using React.js, Node.js, and JavaScript to visualize customer orders and analyze user experience across travel agency websites.
- Developed and maintained RESTful APIs to enable seamless communication between frontend applications and backend services, ensuring reliable data exchange and system integration.
- Optimized database queries and application performance using SQL and MySQL, improving data retrieval efficiency and overall system responsiveness.
- Collaborated with cross-functional teams to analyze requirements, troubleshoot technical issues, conduct software testing, and deliver reliable, scalable software solutions aligned with business objectives. [URL: https://www.meghpolli.com/]

Digital Hub Bangladesh Limited- *Dhaka, Bangladesh* February 2023 - Dec 2025

Software Developer

- Collaborated with WebOps teams, Java backend developers, UI/UX designers, project managers, and QA analysts to coordinate development activities and ensure timely project delivery.
- Assisted senior developers in maintaining, debugging, and enhancing existing codebases based on QA feedback, improving software quality and application stability.
- Implemented object-oriented Java solutions using SQL and relational database mapping techniques to improve code reusability, modularity, maintainability, and debugging efficiency.
- Developed and enhanced features for a GPS Route Tracking System, supporting improved functionality, user experience, and revenue generation.
- Utilized Git for version control, source code management, and collaborative software development across project teams.
- Contributed to a cloud-based software solution for the dumpster rental industry, supporting application development, system functionality, and operational efficiency.
- Assisted in troubleshooting application issues, identifying software defects, and implementing fixes to improve system reliability and performance.
- Supported the development and integration of backend services and database components to ensure efficient data processing and seamless application functionality.
- Participated in code reviews, software testing, and development discussions to maintain coding standards and improve overall product quality. [URL: https://projmantech.com/]

Tai Global - *Dhaka, Bangladesh* January 2022 - Nov 2022

Web Developer

- Developed and maintained software applications, implementing features and updates to enhance **user experience, UI/UX, and** system performance.
- Participated in technical workshops and seminars on software engineering best practices, coding standards, and version control systems.
- Created and maintained documentation, including design specifications, daily progress updates, feature development logs, and monthly performance reports.
- Collaborated in cross-functional teams, contributing to both front-end and back-end solutions, ensuring cohesive and visually appealing applications.
- Developed visualization tools for customer orders and user interactions, improving usability and decision-making insights for eCommerce platforms.
- Designed and implemented interactive **front-end interfaces** for eCommerce platforms using PHP and Laravel. [URL: https://shoppolly.com/]

ACHIEVEMENTS & LEADERSHIP

- Revenue Impact Contributor – Digital Hub Bangladesh: Improved GPS Route Tracking System features, contributing to company revenue growth.
- Portfolio & Freelancing Mentor: Guided juniors and peers in building professional portfolios, freelancing profiles, and securing initial gigs.
- 1st Position – Java Fest, NUBCC, 2022: Recognized for excellence in Java programming competitions.
- Vice President – NUBCC Computer Club: Led club initiatives, workshops, and coding events for students.
- Central Team Leader – ICT Olympiad: Organized and coordinated ICT competitions at national level, mentoring participants and managing teams.
